DETAILED ACTION

Allowable Subject Matter

1. Prosecution on the merits of this application is reopened on claims 6-15 and 19-20 considered unpatentable for the reasons indicated below:

The claims of applications 10/052,806 and 10/052,273 are now almost identical except for one limitation. In 10/052,806, the limitation is "a reaction system configured to stop movement of the pivot arm toward the base assembly upon detection by the detection system of the one or more dangerous conditions". The corresponding limitation in 10/052,273 reads, "a reaction system configured to urge the pivot arm away from the base assembly upon detection by the detection system of the one or more dangerous conditions". In this case, the broader claims in 10/052,806 are anticipated by the more narrow claims in 10/052,273. The limitation "configured to urge the pivot arm away from the base assembly" effectively reads on "configured to stop movement of the pivot arm toward the base assembly", that is, if the pivot arm is urged away from the base assembly then the movement of the pivot arm is also stop from moving toward the base assembly.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3724

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 6, 8-15 and 19-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 5-6, 8-12, and 15-24 of copending Application No. 10/052,273. Although the conflicting claims are not identical, they are not patentably distinct from each other because they differ only in the claim terminology used but encompass the same subject matter, that is, claims 5-6, 8-12, and 15-24 anticipated the claims of 6-15 and 19-20.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 3724

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
